

"Use of Emerging Science and Technologies to Explore Epigenetic Mechanisms Underlying the Developmental Basis for

Thursday Jul, 30, 2009 - Friday Jul, 31, 2009

8:30 AM - 12:00 PM

**Offsite: Keck Building, 500 Fifth Street, NW, Washington, DC
(Regional Event)**

The workshop will include regulatory perspectives and information dissemination to the broader public and clinicians, and will focus on the following:

- * Observations that raise concern about epigenetic changes
- * Existing, emerging, and yet-unidentified tools for screening chemicals for such effects
- * The most pressing needs for research to improve the state of the science
- * Implications for risk practitioners and regulatory decision-makers
- * Strategies for communicating emerging conclusions to the public
